

It should be noted that the only mandatory subject for the Higher School Certificate is English. The Board of Studies offers a wide range of courses for study. This allows students to choose subjects which suit their particular interests and abilities. While students may have an inclination to study certain courses, this is not always possible for a variety of reasons.

At the present point in time the Board of Studies believes the approach it is following and the organisation of language courses for the HSC are the most appropriate. The Board will continue to monitor the situation both here and nationally. It is expected that the study of languages will be looked at closely as part of the work planned in relation to national curriculum.

I trust this information helps to clarify the situation.

Yours sincerely
